I am joined in this 2 part Episode by Dr Tif Qureshi, the undisputed 'King of ABB' (Align, Bleach, Bond).

We really and truly geek out over the Dahl Technique over the 2 episodes. There were just WAY too many gems to cram in to one episode, and not all of it was about Dahl!

This episode (Episode 16) focuses on:

The prestigious award that Dr Qureshi recently won  
Importance of long term follow ups for your learning as a Dentist  
Why you should not chase the big ticket treatment  
An interesting reason why Tif is not chasing new patients  
Are young associates moving job positions too frequently?  
Why the patients that are referred to you are special  
The Dahl Technique as an interceptive treatment modality  
Who is the ideal patient for the Composite Dahl Technique?  
Would you ever do the Dahl technique straight to Ceramic?  
At what point does a Toothwear case become a Full Mouth Rehab instead?  
What is the maximum recommended amount of anterior toothwear you should restore predictably with Dahl?  
How Tif uses Dahl principles to approach a Full Mouth Rehabilitation  
The next episode will be more focused on the clinical side of the Dahl technique.

I promised you a good resource where you can read in-depth about the Dahl technique - as in this episode I assumed you had a basic grasp:

**[BDJ Article about Dahl Technique](#)**

If you found this useful, tell another Dentist!

UPDATE: Just 2 weeks left for the Mega Early Bird tickets for what will be the best

Occlusion course you will ever attend!

Reserve your seat at [Occlusion2020.com](http://Occlusion2020.com) for Dr Michael Melker's signature 2 day course
